

Honorable Dr. Nothnagel,

I have the honor to inform you of my decision to stand once again as a candidate for the Board of Directors of the Hellenic-German Chamber of Commerce in the upcoming AHK elections.

My candidacy is driven by a strong commitment to further strengthening the Chamber's role as a trusted and dynamic bridge between the business communities and the governments of Greece and Germany. I remain deeply convinced of the AHK's vital contribution to Greece's sustainable development, through the empowerment of its member companies. This vision is anchored in three key pillars:

1. **Attracting and supporting foreign investment** in Greece
2. **Promoting innovation** among AHK members as a vehicle for transferring expertise and best practices
3. **Enhancing employability** through a long-term, sustainable growth strategy

A particular focus of my efforts has been the development of the **AHK Health Team**, which I am committed to further elevating as a central platform for bilateral dialogue. During my term, the team achieved significant milestones:

- It formally updated its economic footprint in Greece, earning its place among the Chamber's strategic priorities alongside energy, education, and tourism.
- It continued communicating a forward-looking action plan aimed at contributing to the reform of the national healthcare system.
- It played a pivotal role in the **Innovations Forum**, positioning health as a key pillar of innovation and sustainable development, and showcasing successful collaborations between the public sector, private enterprises, patient communities, and start-ups.
- It contributed to the **successful participation of German pharmaceutical companies at the 88th Thessaloniki International Fair (TIF)**, highlighting the sector's innovation, export potential, and commitment to bilateral cooperation in health and life sciences.

The presence of **Boehringer Ingelheim Hellas**, where I have the privilege of serving as President and Managing Director exemplifies the Chamber's vision. With an export level of €1,3 billion in 2024, continuing investments in the country, local production and exports plant, recognition as one of the world's 100 most innovative companies, and a clear roadmap aligned with post-COP26 sustainability goals and climate targets for 2030, the company stands as an ambassador of what the Hellenic-German partnership can achieve.

Additionally, in my capacity as Vice President of the Hellenic Association of Pharmaceutical Companies, I am committed to encouraging broader participation in the Chamber. By welcoming more companies into the AHK network, we can further strengthen its institutional presence, enhance its reputation, and solidify its role as a trusted partner in Greece's sustainable future.

Thank you for your continued support and for our constructive collaboration in advancing this shared mission.

**With sincere regards,
Dimitris Anagnostakis**
