

Pantelis Capros is Professor Emeritus in Energy Economics and Operations Research at the Department of Electrical and Computer Engineering at the National Technical University of Athens (NTUA). He is the founder of the E3MLab, a research group modelling the interactions between energy, economy, and environment. His world-renowned models PRIMES, PRIMES-TREMOVE, Prometheus, and GEM-E3 have been widely applied in impact assessment studies conducted by the European Commission and employed by various governments and utility organisations.

Professor Capros has an engineering degree from the National Technical University of Athens (NTUA), three MSc degrees in Economics, Computer Science, and Operations Research, and a PhD in Mathematical Economics. He has authored several scholarly books and published over 200 scientific papers.

Prof. Capros was the first Chairman of the Regulatory Authority for Energy in Greece, a member of the Board of Directors of the Public Power Corporation for several years, and a Professor at the University of Paris I Sorbonne until 2000. Additionally, he assumed the role of interim Minister of Energy and Environment in Greece from May to June 2023. He is currently the President of E3Modelling SA, part of the RICARDO PLC group.
