

Vasilis Stenos
Co-Founder & CEO
Solmeyea

Vasilis Stenos is an Environmental Engineer from Columbia University and an EU Climate Impact Ambassador, recognized by the European Commission for his contribution to sustainable innovation. He is the Founder and CEO of Solmeyea, a multi-awarded BioTech company producing carbon-negative food proteins through microalgae fermentation, the first globally to use CO₂ as a feedstock. Under his leadership, Solmeyea has earned the EU Seal of Excellence and major awards from the EIC, ESA, and CBE-JU for advancing industrial decarbonization and the circular bioeconomy. Vasilis has over 15 years of global experience in sustainability and consulting across Europe, the U.S., and Africa.
